

DAGO RGB

Steplights RGB

design Roberto Mantovani

The Dago RGB range proposes asymmetrical emission fixtures that combine high performance with compactness in a minimal and discrete compositional element able to generate effective and fascinating lighting effects.

La gamma Dago RGB propone apparecchi ad emissione asimmetrica che uniscono alte prestazioni ad una dimensione ridotta, offrendosi come elemento compositivo minimale e discreto, in grado di generare efficaci ed interessanti effetti luminosi.

La gamme Dago RGB propose des appareils à émission asymétrique qui unissent des prestations élevées à une dimension réduite, ce qui fait d'elle un élément de composition minimal et discret, capable de générer des effets lumineux efficaces et intéressants.
